Upcoming Webinar **Digital tools for wood traceability in smart forestry**

Date: 4 February 2026

Duration: 1 hour, 10.00-11.00 am (CET)

Format: Online | Free | Open to all

Language: English (Ukrainian translation available)

This one-hour session will focus on Pilot 1, where we will present the DigiMedFor Data Traceability Platform System (DTPS) and related digital tools that enable end-to-end timber traceability, from standing trees in the forest to logs and processed wood, supporting compliance with EU regulations such as the EUDR.

The webinar will explore how technology strengthens transparent and efficient wood tracking through a cloud-based platform with blockchain integration, supported by RFID tags, mobile apps, and certified drone flights, linking trees, logs, and sawn timber across the forest–wood value chain.

Agenda Highlights

- Data Traceability Platform System
- Picture-based tracking system
- Insights from the Italian pilot & lessons learned
- Open Q&A and replication discussion
